In order to protect the forest resources,

Earth, from sudden fire and smoke

Identify strong

됬

Qο

1. CUSTOMER SEGMENT(S)

of fire

CS

which are essential for supporting life on outbreaks. The forest management group does require this gadget. in places at risk

6. CUSTOMER CONSTRAINTS

CC

The devastation is caused by greenhouse gases and changes in the climate. The human tendency to consume resources greedily is another important contributing cause to forest fires

5. AVAILABLE SOLUTIONS

AS

Explore AS, differentiate

Focus on J&P, tap into BE, understand RC

For the purpose of detecting forest fires, existing systems use optical sensors. The sensors alert the office of forest management when a fire is spotted. In addition, satellites are utilised to find IR rays seen in forested areas

2. JOBS-TO-BE-DONE / PROBLEMS

J&P

By releasing a lot of carbon dioxide, carbon monoxide, and fine particulate matter into the environment, the main issue is weather and climate. As a result. air pollution can lead to a variety of health problems, such as respiratory and cardiovascular disorders.

9. PROBLEM ROOT CAUSE

The following are some rationales

1. Lightning, a natural occurrence

flames, and electric sparks

order to save lives.

2. Man-made causes: cigarettes, naked

Therefore, ongoing care and observation

are required to protect natural resources in

RC

7. BEHAVIOUR

BE

When fire is detected the sytem which is implemented to monitor the forests sets the alarm to ring, that is it gives the signal through which fire management team and the forest committee tries to call off the fire. Thus, the aim is to recognise the fire as early as possible to prevent spread of fire which will cause further damage and it'll become

difficult to control.

3. TRIGGERS

TR

Due to the existence of a great deal of dry grass all around and the possibility of the campfire remaining scorched, the uncontrolled behaviour toward burned cigarettes can spread.

4. EMOTIONS: BEFORE / AFTER

ΕМ

Since the variables that affect a wildfire's course and intensity are erratic and subject to alter at any time, they can be very stressful. People who have experienced wildfires may experience severe anxiety and mood swings.

SL

8. CHANNELS of BEHAVIOUR

СН

We have presented a method to detect forest fires early using CCTV camera surveillance, which can detect fire in both indoor and outdoor activities, in order to reduce these losses. In order for the forest management office to stop the damage brought on by the fire, immediate alarms must be given to them

Online detection: As a result, the chatbot or the API can connect over the internet to provide you with information on the forest's present condition.

Offline Detection: As a result, the forest managers can notify surrounding residential areas or raise awareness through the media (news, radio).
